PROJECTS

Agentic Appliance Control System, Smart Energy Management using AI & IOT 06/2026 – Present
Building an AI-powered IoT system (ESP32, Raspberry Pi, MQTT, AI agents) to automate smart-appliance control, aiming to cut residential grid dependency from 24% to 15% through real-time energy monitoring.

Ask Pilot, Context-Aware Conversational AI Agent 05/2026 – 06/2026
Built a stateful AI agent using LangGraph with live data integration, persistent memory, and agentic tool execution, enabling context-aware, multi-turn conversations without losing prior conversational state.

Chat App, Real-Time Chat Application 02/2026 – 04/2026
Designed a real-time MERN chat application using Socket.IO, built to support high-concurrency real-time messaging with low latency, JWT-based authentication, and a responsive React UI for private conversations via REST APIs.

CERTIFICATES & ACHIEVEMENTS

- **Hackathon Participant** — Built *Rescue Sync*, a Disaster Management System prototype.
- **24-Hour Codathon** — Demonstrating teamwork, problem-solving, and time management.
- **Data Science & Machine Learning Internship** — Edureka Completed hands-on training in data science and ML fundamentals.
